

Hossein Hosseini – Senior Software & AI Engineer

Passionate about building intelligent systems, Hossein combines expertise in software engineering and AI to deliver scalable solutions. With a strong foundation in Python and cloud technologies, he specializes in:

- **AI/ML:** Developing LLM-powered applications (RAG, fine-tuning) using frameworks like LangChain and Hugging Face.
- **Cloud & APIs:** Designing robust backend systems on GCP/AWS with a focus on MLOps.
- **Full-Stack:** End-to-end development, from model training to deployment.

Known for solving complex problems with clean, efficient code, Hossein thrives in bridging the gap between research and production.

Tech Stack: Python, TensorFlow/PyTorch, Docker, Kubernetes, LLMs (Gemini, Mistral, OpenAI).
